

## Data Product Innovation Intern

VEER.IO is a tech start-up founded in Germany. We support the manufacturing industry and large commercial operators worldwide to overcome their business operation challenges through innovative technology.

We are currently developing new data products from our big data pool of electricity measurements by translating them into economic intelligence data.

We are looking for a Data Product Innovation Intern who is eager to learn about our company and interested in working at a tech start-up on focused on data business. You will be working closely with our Co-founder / Managing Director to conduct research and collect data to support the development of new products.

This is a part-time position based in Bangkok, starting as soon as possible.

### Intern Duties and Responsibilities:

- Support identifying customers' problems
- Perform research on solutions discovery and concept validation
- Support the development of Minimum Viable Products (MVP)
- Support the implementation of ongoing projects in Southeast Asia

### Intern Requirements:

- Highly motivated and interested in the work of tech start-ups
- Excellent critical thinking and problem-solving skills
- Eager to learn and work on various tasks
- Ability to multitask
- Detail-oriented with strong organizational skills
- Fluency in English (both written & spoken) is a plus

We hope to have you join our team very soon. Please send your CV and a short motivation letter to [karun.pantong@getveer.io](mailto:karun.pantong@getveer.io) with "Application for Data Product Innovation Intern" in the subject line. The deadline for submitting your application is the **30 April 2021**. We are looking to fill this position as soon as possible and plan to begin the interview process as soon as the applications start to come in. Only shortlisted candidates will be contacted.
